

Qemu Guest Agent - auf Windows nicht mehr installierbar

So you can control the state of the service as well as the QGA VSS provider. What I would do is: uninstall every QEMU-GA from AddRemovePrograms. look if `c:\Program Files\qemu-ga\qemu-ga.exe` is still there (shouldn't be in `C:\Program Files (x86)`) if not, copy the entire `c:\Program Files\qemu-ga\` folder from an existing server to this server run

```
"c:\Program Files\qemu-ga\qemu-ga.exe" -s uninstall  
"c:\Program Files\qemu-ga\qemu-ga.exe" -s vss-uninstall
```

install QEMU-GA again from the right MSI file If after this you are still left with the issue you can try and get some output from the command the MSI is trying to run:

```
"c:\Program Files\qemu-ga\qemu-ga.exe" -s vss-install
```
