

# Fix Probleme mit locales in Debian/Proxmox

Nach Updates kann es vorkommen das die „locales“ nicht mehr richtig gesetzt sind.

```
perl: warning: Setting locale failed.
perl: warning: Please check that your locale settings:
    LANGUAGE = (unset),
    LC_ALL = "de_AT.UTF-8",
    LANG = "en_US.UTF-8"
    are supported and installed on your system.
perl: warning: Falling back to a fallback locale ("en_US.UTF-8").
locale: Cannot set LC_CTYPE to default locale: No such file or directory
locale: Cannot set LC_MESSAGES to default locale: No such file or directory
locale: Cannot set LC_ALL to default locale: No such file or directory
/usr/bin/locale: Cannot set LC_CTYPE to default locale: No such file or
directory
/usr/bin/locale: Cannot set LC_MESSAGES to default locale: No such file or
directory
/usr/bin/locale: Cannot set LC_ALL to default locale: No such file or
directory
Generating locales (this might take a while)...
```

Der nachfolgende Befehl behebt das für Deutsch.

```
dpkg-reconfigure locales
```

Dann die de\_AT.UTF-8 UTF-8 auswählen und als Standard setzten.
